# 2 Positions Held

- Since July 2023, *Researcher (RTD-A) in Computer Engineering*, SSD ING-INF/05, at DIMES, University of Calabria, Rende (CS).

  Scientific Supervisor: Prof. Domenico Talia.

- From April 2026 to July 2026, *Research Intern* at the Data Management and Knowledge-Driven AI (DMKI) Lab, Databases and Artificial Intelligence (DBAI) Group, Institute of Logic and Computation, Faculty of Informatics, TU Wien, Austria.

  Research Title: *Uncertainty-Aware Text-to-SQL with Abstention under Domain Knowledge in Agentic LLM Systems.*

  Scientific Supervisor: Prof. Dr.-Ing. Katja Hose.

- From March 2023 to July 2023, *Research Fellow* at DIMES, University of Calabria, Rende (CS), within the *ASPIDE* project.

  Research Title: *Topic Detection and Tracking Techniques from Social Media Data.*

  Scientific Supervisor: Prof. Fabrizio Marozzo.

- From April 2021 to July 2022, *Research Intern* at the Department of Computer Science, Workflows and Distributed Computing Group, Barcelona Supercomputing Center (BSC), Spain.

  Research Title: *Machine Learning for Optimizing Data-Intensive Workflow Execution in HPC Systems.*

  Scientific Supervisor: Prof. Rosa M. Badia.

- From November 2019 to March 2023, *Ph.D. Student in Information and Communication Technologies* at DIMES, University of Calabria, Rende (CS).

  Research Title: *Distributed Big Social Data Analysis: Advanced Techniques and Execution Strategies.*

  Scientific Supervisor: Prof. Paolo Trunfio, co-supervisor: Prof. Fabrizio Marozzo.

- From July 2019 to October 2019, *Research Fellow* at DIMES, University of Calabria, Rende (CS), within the *ASPIDE* project.

  Research Title: *In-Memory Techniques for Efficient Execution of Data-Intensive Applications on Exascale Architectures.*

  Scientific Supervisor: Prof. Paolo Trunfio.

- From July 2018 to June 2019, *Research Collaborator* at DIMES, University of Calabria, Rende (CS), within the *Smart Macingo* project.

  Research Title: *Data Analysis Techniques for Price Estimation in Transportation Services.*

  Scientific Supervisor: Prof. Paolo Trunfio.

# 3 Education and Training

- European Ph.D. in Information and Communication Technologies, DIMES, University of Calabria, Rende (CS).

  Thesis Title: *Distributed Big Social Data Analysis: Advanced Techniques and Execution Strategies.*

  Supervisor: Prof. Paolo Trunfio.

  Co-supervisor: Prof. Fabrizio Marozzo.

  Evaluation: Excellent

  Completion Date: 07/03/2023.

- Participation in the $1^{st}$ International School on Internet of Things and Edge AI: Computing, Communications and Systems, Falerna (CZ).

  Organizer: DIMES, University of Calabria, with the sponsorship of the IEEE Italy section and the Computer Engineering Group (GII).

  Date: 08-12/09/2022.

- Master's Degree in Computer Engineering, University of Calabria, Rende (CS).

  Thesis Title: *Analysis of Political Polarization of Twitter Users through Neural Networks.*

  Advisors: Prof. Paolo Trunfio, Prof. Fabrizio Marozzo.

  Evaluation: 110/110 cum laude.

  Completion Date: 12/04/2019.

- Bachelor's Degree in Computer Engineering, University of Calabria, Rende (CS).

  Thesis Title: *Using the ELKI Framework for the Discovery of Regions of Interest through Clustering Techniques.*

  Advisors: Prof. Paolo Trunfio, Prof. Fabrizio Marozzo.

# 4 Research Activities

Riccardo Cantini's research spans two interconnected areas: *large language models and sustainable AI*, with a focus on LLM and agentic systems, their applications, interpretability, fairness, trustworthiness, and efficient deployment in edge-based settings, and *big social data analysis*, with emphasis on political polarization, data-intensive applications, and efficient processing across distributed and edge-to-cloud environments.

## 4.1 Large Language Models and Sustainable AI

**LLM Applications.** Research explores LLM-based methods for extracting knowledge and insights from unstructured data, particularly in social media and healthcare. Contributions include hashtag recommendation, topic modeling, misinformation detection, automated reporting and summarization, public health and disaster monitoring, disease grade prediction, and mental health detection. Recent work investigates agentic conversational systems for natural-language access to structured domain knowledge, including clinical trial information and domain-specific data subject to business rules. A recurring focus is the integration of explainability and interpretability into LLM pipelines to produce reliable and actionable outputs.

**Efficient and Responsible AI.** Research addresses the computational, environmental, and social sustainability of AI. Contributions include knowledge distillation, neural network pruning and quantization, parameter-efficient fine-tuning, and their combination for efficient training and deployment on resource-constrained devices. This line of work also includes green-aware neural architecture search and interpretable energy estimation for edge AI systems. The social dimension encompasses LLM bias and stereotypes, adversarial robustness, and the effects of model scale and reasoning capabilities on fairness and safety. At the intersection of efficiency and responsible AI, research explores the joint optimization of model compression and fairness under resource constraints by designing quantization-aware debiasing techniques with mixed-precision allocation within a fixed memory budget.

### 4.2 Big Social Data Analysis

**Political Polarization in Big Social Data** Research focuses on politically polarized social media data generated during elections and referenda. Contributions include neural and semi-supervised methods for scalable estimation of user polarization; sentiment and emotional-support analysis of political actors; assessment of the effects of bots and temporal dynamics on polarization estimates; and analysis of information diffusion, influence, and competing narrative strategies in polarized networks.

**Big Data Frameworks and ML-Based Optimizations.** Research addresses the efficient execution of data-intensive applications in high-performance distributed environments. Contributions include the investigation of scalable programming paradigms for big data analysis and machine learning-based optimization of parallel and distributed systems, including workflow scheduling and data partitioning strategies for reducing resource consumption and execution time. This systems perspective extends to the edge-to-cloud continuum, applying machine and deep learning to sensor data analysis, smart agriculture anomaly detection, and industrial decision-support systems, connecting scalable data processing with domain-specific applications across industrial and environmental contexts.

## 5 List of Publications

### Journals

# 6 Participation in Projects

- *ECHO-TWIN: Edge-Cloud-HPC Optimized Twins based on Workflow-enhanced Inference Networks*

  Funding: Italian Ministry of University and Research (MUR), within the National Research, Innovation and Competitiveness Plan 2021–2027 (PN RIC 2021–2027), with the contribution of the European Union, in continuity with NRRP investments supporting research and innovation.

  Research Objective: development of AI-driven digital twin systems across the Edge–Cloud–HPC continuum, enabling scalable, energy-efficient, and secure data processing to support research, industry, and public-sector innovation through advanced computing infrastructures and technology transfer.

- *FAIR: Future Artificial Intelligence Research*

  Funding: European Union's NextGenerationEU program, under the Italian National Recovery and Resilience Plan (NRRP).

  Research Objective: design and implementation of sustainable AI techniques focusing on interpretable energy estimation and the efficient, fair, and trustworthy use of Large Language Models.

- *eFlows4HPC: Enabling Dynamic and Intelligent Workflows in the Future EuroHPC Ecosystem*

  Funding: European High-Performance Computing Joint Undertaking (EuroHPC JU).

  Research Objective: use of machine learning techniques for optimizing data partitioning to support efficient execution of data-intensive workflows in HPC environments.

- *ASPIDE: exAScale ProgramIng models for extreme Data procEssing*

  Funding: European Union's Horizon 2020 Research and Innovation Programme.

  Research Objective: development of in-memory techniques for the efficient execution of data-intensive applications on Exascale architectures.

- *Smart Macingo*

  Funding: European Regional Development Fund (ERDF), under the Calabria Regional Operational Programme (ROP) 2014–2020.

  Research Objective: use of machine learning techniques to estimate transportation service prices.

# 7 Professional Services

## Editorial Board

- Associate Editor of *Journal of Big Data*, Springer (SJR rank: Q1).
- Editorial Board Member of *Discover Artificial Intelligence*, Springer (SJR rank: Q1).
- Guest Editor for the special issue *Generative AI and Large Language Models* in the journal *Big Data and Cognitive Computing* (SJR rank: Q1).

## Program Committee

- Program Chair

  2025 *Workshop on Green-Aware Artificial Intelligence* (Green-Aware AI), co-located with the *28th European Conference on Artificial Intelligence* (ECAI, Core rank: A).

  2024 *Workshop on Green-Aware Artificial Intelligence* (Green-Aware AI), co-located with the *23rd International Conference of the Italian Association for Artificial Intelligence* (AIxIA).

- PC Member

2024–2026 *International Conference on Discovery Science* (DS, Core rank: B).

2023–2026 *International Conference on Advanced Data Mining and Applications* (ADMA, Core rank: C).

2026 *Workshop on Computing for Well-being* (WellComp), co-located with the *ACM International Joint Conference on Pervasive and Ubiquitous Computing* (UbiComp, Core rank: A*).

2026 *European Conference on Machine Learning and Principles and Practice of Knowledge Discovery in Databases* (ECML-PKDD, Core rank: A).

2025 *Workshop on Fairness and Bias in AI* (AEQUITAS), co-located with the *28th European Conference on Artificial Intelligence* (ECAI, Core rank: A).

2025 *Workshop on Hypermedia Multi-Agent Systems* (HyperAgents), co-located with the *28th European Conference on Artificial Intelligence* (ECAI, Core rank: A).

2025 *World Conference on Explainable Artificial Intelligence* (XAI).

2024 *Workshop on Large Language Model Agents* (LLMAgents) co-located with the *International Conference on Learning Representations* (ICLR, Core rank: A*).

## Organization of Scientific Events

- Organizer of the *1st Workshop on Research and Innovation in Scalable and Efficient Deep Learning (RISE-DL 2026)* at the *16th International Conference on the Internet of Things (IoT 2026)*, with the sponsorship of the ECHO-TWIN project, Newcastle upon Tyne (UK), 17-20 November, 2026.
- Organizer of the *2nd Workshop on Green-Aware Artificial Intelligence (Green-Aware AI 2025)* at the *28th European Conference on Artificial Intelligence (ECAI 2025)*, with the sponsorship of the FAIR Foundation, Bologna, 25-26 October 2025.
- Organizer of the *2nd FAIR Spoke Workshop, Spoke 9 – Green-Aware AI*, Rende, 24-25 March 2025.
- Organizer of the *1st Workshop on Green-Aware Artificial Intelligence (Green-Aware AI 2024)* at the *23rd International Conference of the Italian Association for Artificial Intelligence (AIxIA 2024)*, with the sponsorship of the FAIR Foundation, Bolzano, 25-28 November 2024.

## Reviewing Activity

- International journals include: *ACM Computing Surveys*, *IEEE Transactions on Neural Networks and Learning Systems*, *IEEE Transactions on Big Data*, *IEEE Transactions on Cloud Computing*, *IEEE Transactions on Parallel and Distributed Systems*, *Journal of Big Data*, *Machine Learning*, *Data Mining and Knowledge Discovery*, *Future Generation Computer Systems*, *Journal of Intelligent Information Systems*, *Computer*, *Social Network Analysis and Mining*, *Discover Artificial Intelligence*, and *Artificial Intelligence Review.*
- International conferences include: *International Conference on Learning Representations* (ICLR), *IEEE International Conference on Data Mining* (ICDM), *European Conference on Artificial Intelligence* (ECAI), *European Conference on Machine Learning and Principles and Practice of Knowledge Discovery in Databases (ECML-PKDD)*, *International Conference on Advanced Data Mining and Applications* (ADMA), *International Conference on Discovery Science* (DS), *World Conference on Explainable Artificial Intelligence* (XAI), *IEEE International Conference on Big Data* (BigData), *International European Conference on Parallel and Distributed Computing* (EuroPar), *International Conference on Parallel Processing* (ICPP), *IEEE International Conference on Machine Learning and Applications* (ICMLA), and *IEEE International Conference on Bioinformatics and Biomedicine* (BIBM).

# 8 Teaching Activities

- **Algorithm and Programming Techniques**, Medicine and Surgery - Digital Technologies, University of Calabria, Rende (CS).

  Topics Covered: algorithm design techniques, including greedy methods, dynamic programming, divide-and-conquer, and backtracking, applied to search, optimization, and graph problems. Python is used to implement and analyze solutions, with examples drawn from medical contexts.

  *Main Teacher*, 28 hours of lessons. A.Y. 2026-2027.

- **Generative AI and Data Science: Opportunities, Risks, and Solutions**, Excellence Program, DESF, University of Calabria, Rende (CS).

  Topics Covered: generative AI and data science, focusing on their integration into data analysis workflows. The course addresses key limitations and risks (e.g., hallucinations and misalignment) and covers methods for assessing reliability and uncertainty, as well as prompting and alignment techniques.

  *Main Teacher*, 15 hours of lessons. A.Y. 2025-2026.

- **Business Intelligence**, Master's Degree in Data Science for Business Analytics, DESF, University of Calabria, Rende (CS).

  Topics Covered: design and implementation of decision support systems for strategic, tactical, and operational decision-making, with a focus on data warehousing, ETL processes, multidimensional modeling, OLAP, performance management, and the use of BI tools for analysis and reporting.

  *Main Teacher*, 28 hours of lessons. A.Y. 2025-2026.

- **High-Performance Computing**, Master's Degree in Computer Engineering, DIMES, University of Calabria, Rende (CS).

  Topics Covered: main principles and practical aspects related to high-performance computing, with a focus on GPU computing in CUDA, and the MPI (Message Passing Interface) paradigm, encompassing both shared and distributed memory implementations.

  *Teaching Assistant*, 16 hours of lessons. A.Y. 2025-2026, 2024-2025, 2023-2024.

- **Operating Systems**, Bachelor's Degree in Computer Engineering, DIMES, University of Calabria, Rende (CS).

  Topics Covered: main constructs for modeling and implementing multi-threaded applications, issues related to synchronization and access to shared variables, and concurrency mechanisms in Java, particularly Semaphores and Monitors.

  *Teaching Assistant*, 27 hours of lessons. A.Y. 2024-2025, 2023-2024, 2022-2023, 2021-2022.

- **Distributed Systems and Cloud/Edge Computing for IoT**, Master's Degree in Computer Engineering for the Internet of Things, DIMES, University of Calabria, Rende (CS).

  Topics Covered: fundamental concepts of Edge Computing, Cloud architectures and the Internet of Things, with a focus on major tools and frameworks for modeling, simulating, and implementing large-scale interoperable IoT applications.

  *Teaching Assistant*, 23 hours of lessons. A.Y. 2021-2022, 2020-2021, 2019-2020.

Riccardo Cantini has also served as a **Thesis Advisor** for over 50 graduating students at DIMES, University of Calabria, overseeing both bachelor's and master's theses. The main topics of the supervised theses include machine and deep learning, NLP, large language models, agentic AI, sustainable AI, and big data analysis. Additionally, he has acted as an **Academic Tutor** for internship programs in companies, guiding students through their practical training experiences.

## 9 Awards

- Ph.D. thesis *Distributed Big Social Data Analysis: Advanced Techniques and Execution Strategies* recognized among the top 3 theses in *2024 Best Ph.D. and Master Thesis Awards in Big Data & Data Science*, organized by The CINI Data Science Lab.
- Journal article *Analyzing Political Polarization on Social Media by Deleting Bot Spamming* selected as the *issue cover* of Big Data Cogn. Comput., Volume 6, Issue 1 (March 2022), and listed as an *Editor's Choice article* for its significance and impact in the field.

**Declarations.** I authorize the processing of my personal data included in the CV, in accordance with Article 13 of Legislative Decree no. 196 of June 30, 2003, "*Personal Data Protection Code*," and Article 13 of GDPR 679/16, "*European Regulation on the Protection of Personal Data*". I declare that the information provided in the CV is accurate and truthful. I declare to be aware of the implications of asserting the truthfulness of the above representation and to be informed of the criminal penalties under Article 76 of Legislative Decree no. 445 of December 28, 2000, "*Consolidated Text of Legislative and Regulatory Provisions Regarding Administrative Documentation*," and in particular of what is provided for by Article 495 of the Criminal Code in case of false statements or false attestations. The above is presented in the form of a self-certification under Articles 19, 46, and 47 of Legislative Decree no. 445/2000.
